## **2007 IDAHO WHEAT VARIETIES - SUPPLEMENT**

During the 2007 survey, we collected positive reports for 98 different wheat varieties. The top twenty varieties account for 71.7 percent of the wheat planted in Idaho for the 2007 crop. This supplement lists estimates for 27 additional varieties which account for 22.1 percent of Idaho's total wheat planted.

Included in the report are acreages of wheat in which multiple varieties were mixed at seeding. A total of eight different combinations of wheat varieties were reported. Only one of these combinations had sufficient reports and acreage to be published.

New varieties listed in this supplemental report that were not listed in last year's wheat variety reports include; Eddy, Snow Crest, Paladin, Pristine, Chukar, and ORCF 102.

Partial funding for the 2007 Idaho Wheat Variety Survey was provided by the Idaho Wheat Commission.
